III. Foreign Exchange:

A. Conditions:

Foreign Exchange Service is a local service furnished to a customer from an exchange other than the one from which service would normally be provided and is limited to one party, key and PBX trunk line service. Foreign Exchange Service is not provided in connection with public or semi-public telephone service.

1. The "normal exchange" is that in which the customer is located.
2. The "foreign exchange" is that from which the customer desires service.

This is a special service and will be furnished in accordance with such methods as are best suited to meet plant and operating requirements subject to the availability of facilities.

The rates, rules and regulations of the foreign exchange apply for the class of service and equipment provided from the foreign exchange.

Mileage measurements for interexchange channel charges is the airline distance between the principal central offices of the normal and foreign exchange. When service is provided jointly with one or more telephone companies, each telephone company's rates apply to that portion of the airline message within its operating area.

Service may terminate at the normal exchange in Private Branch Exchange, a telephone instrument or any other authorized equipment.

Foreign Exchange Service will be furnished in connection with Hotel-Motel Service only for the use of the management in the conduct of the business.

III. Foreign Exchange: (Continued)

A. Conditions: (Continued)

Foreign Exchange Service requested from other than the principal central office of a multi-office exchange will be provided according to the rates and regulations outlined for Foreign Central Office Service.

B. Rates:

The appropriate business or residence monthly rates of the foreign exchange shall apply. The application of service charges is based on the work activity performed in both the foreign exchange and the normal exchange.

Interexchange mileage per channel per mile

This Telephone Company concurs in the monthly rates and regulations for interexchange channels as filed with the Indiana Utility Regulatory Commission by the Indiana Bell Telephone Company, Inc. in Part I, Section 5 of their Tariff I.U.R.C. No. T-7.

Facilities between the principal central office and the customer's premises in the normal exchange are furnished at the current mileage rate; however, service charges, as required for the class of service being provided, are applicable. Interoffice cable pair rates, if appropriate, are applicable where the customer's location is outside the principal central office serving area.
